Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16, 17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Tuckey et al (US 4,394,852). Crankcase pressure pulses to the carburetor are controlled by the valve device in FIG. 2 so as to supply priming fuel to the engine. The normal operation of the priming system inherently performs the claimed method.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tuckey et al (US 4,394,852) in view of Stenz et al (US 6,152,431). Tuckey et al discloses the claimed invention as stated above except for conducting the pressure pulses to a fuel bowl. Stenz et al teaches that it is known to apply pressure above fuel in a fuel bowl (column 5, lines 2-7). It would have been obvious to one having ordinary skill in the art at the time the invention was

made to construct the priming system of Tuckey et al so as to apply pressure above fuel in a fuel bowl, as taught by Stenz et al, in order to provide a carburetor structure suitable for priming.

Allowable Subject Matter

Claims 1-15 are allowed.
